

Information on Derma Genesis * Microdermabrasion & Skin Rejuvenation & Hair Removal

Derma Genesis Microdermabrasion is the new skin restoration procedure for smoother younger looking skin. Skin problems such as acne, fine lines and sun damage previously treated with lasers and chemical peels can now be treated with Derma Genesis. The Derma Genesis system is safe and virtually a painless alternative for skin rejuvenation.

Microdermabrasion is setting the new standard for skin care. This procedure is fast, predictable and painless. While you relax Derma Genesis uses medical grade crystals to remove the dead, outermost layer of skin. This skin exfoliation process reveals the new living skin cells that are soft, smooth and receptive to nutrients. Microdermabrasion is commonly used to treat and/or diminish;

- Blackheads & Whiteheads
- Fine lines & Wrinkles
- Sun Damaged Skin
- Acne Prone Skin
- Superficial Age Spots
- Hyper pigmentation
- Oily Skin
- Dry or Patchy skin

Before and After: The average microdermabrasion procedure takes less than thirty minutes. Many notice improvements in the texture and appearance of their skin immediately after the first treatment. The long term benefits of multiple procedures can be remarkable. A sample treatment may be performed on your hand during consultation to verify the painlessness of microdermabrasion.

Hair Removal and Skin Rejuvenation System by the McCue Ultra VPL is the most advanced hair removal and skin rejuvenation product available. The state of the art variable light technology (VPL) provides optimal parameters for each individual, ensuring safe, fast, and effective treatment therapy. Why is this system so special? Research has shown that intense pulsed light and in particular variable pulsed light are regularly producing better results than the laser units originally available. Pulsed light units are non-laser, emitting light across a broad range of wavelengths that are preferentially absorbed by the appropriate structure in the skin. This means that a greater range of skin and hair types can be safely and effectively treated.

Skin Rejuvenation Treatments include;

- Rosacea
- Sun Damage
- Age Spots
- Freckles
- Pigment Changes
- Fine Lines
- Wrinkles
- Hair Removal

Microdermabrasion, Skin Rejuvenation, and Hair Removal procedures are provided under the supervision of Dr. Martin Molina in our office. We also have two certified aesthetic professionals available for consultation and treatment.

The Ultra VPL provides safe and effective treatment for most hair and skin types. We are very excited to offer these services to our patients. You can be confident that you will receive the highest quality of care.

Please call our office for more information, or to schedule a consultation that will guide you in determining what treatment is beneficial to you. **The number to call is (512)-524-2336.**
